

[First Last Name]

[City, State] | [email@example.com] | [Phone Number]

PROFESSIONAL SUMMARY

Detail-oriented **[Licensed Plumber]** with [X+] years of experience in residential, commercial, and light industrial plumbing systems. Proven track record of completing installations, repairs, and preventative maintenance on time, within budget, and in compliance with local plumbing codes. Skilled at diagnosing complex issues, communicating clearly with clients, and coordinating with contractors and inspectors to ensure safe, efficient, and code-compliant work. Known for strong customer service, clean workmanship, and adherence to safety and quality standards.

PROFESSIONAL EXPERIENCE

[Lead Plumber] | [ABC Mechanical Services]

[Month Year] – Present

[City, State]

- Led installation and rough-in of complete plumbing systems for [X+] new residential and small commercial projects annually, ensuring full compliance with [Local/State] plumbing codes and project specifications.
- Diagnosed and resolved complex issues with water supply, drainage, and gas lines using tools such as [pipe inspection cameras], [pressure testing equipment], and [digital leak detectors], reducing repeat service calls by approximately [X%].
- Coordinated with general contractors, site supervisors, and inspectors to schedule inspections, submit required documentation, and close out permits, contributing to on-time completion of projects and minimizing costly rework.

[Journeyman Plumber] | [Reliable Plumbing & Heating]

[Month Year] – [Month Year]

[City, State]

- Performed service calls for residential and light commercial clients, including repair and replacement of [water heaters], [faucets], [toilets], [sump pumps], and [garbage disposals], consistently maintaining a customer satisfaction rating above [X%].
- Installed and tested [PEX], [copper], and [PVC] piping systems, including soldered, crimped, and threaded connections, following blueprints and using tools such as [pipe threaders], [tube benders], and [press tools].
- Conducted preventative maintenance on plumbing and hydronic heating systems, including flushing water heaters, inspecting backflow preventers, and checking for leaks, helping reduce emergency callouts for key accounts by [X%].

EDUCATION & CERTIFICATIONS

[Plumbing Technology Certificate] | [Name of Trade School / Community College]

[Month Year] – [Month Year]

[City, State]

- Completed coursework in [Plumbing Codes], [Blueprint Reading], [Pipefitting], [Gas Piping], and [Backflow Prevention].

[Apprenticeship Program – Plumbing] | [Name of Union/Contractor]

[Month Year] – [Month Year]

[City, State]

- Accumulated [X,000+] supervised hours in residential and commercial plumbing under licensed journeymen and master plumbers.

[Licenses & Key Certifications]

- [State Journeyman Plumber License] – [License Number, State]
- [Backflow Prevention Tester Certification] – [Issuing Authority]
- [OSHA 10/30-Hour Construction Safety Training]

SKILLS

- Technical:** Installation and repair of [water supply lines], [drainage systems], [venting], [gas piping], [fixtures], and [water heaters] (tank and tankless).
- Tools & Equipment:** Proficient with [pipe cutters], [threaders], [press tools], [soldering equipment], [pipe inspection cameras], [drain augers], and [pressure testing equipment].

- **Codes & Compliance:** Working knowledge of [IPC/UPC], local plumbing codes, permit processes, and inspection requirements.
- **Diagnostics:** Leak detection, low-pressure troubleshooting, drain blockages, and system performance assessment.
- **Planning & Documentation:** Reading blueprints, measuring and laying out piping runs, documenting work orders and material usage.
- **Customer Service:** Clear communication of repair options and costs, professional conduct in occupied homes and businesses, focus on cleanliness and minimal disruption.
- **Teamwork & Safety:** Collaboration with contractors and apprentices, adherence to PPE and safety protocols, safe use of ladders and power tools.

SELECTED PROJECTS

[Multi-Unit Residential Plumbing Installation] | [New Construction Project]

[Month Year] – [Month Year]

- Assisted in layout and installation of complete plumbing systems for a [X]-unit apartment building, including main water service, distribution lines, DWV systems, and fixture rough-ins and trims.
- Collaborated with the project manager to sequence work with other trades, helping keep the project on schedule and reducing rework caused by conflicts with HVAC and electrical runs.

[Commercial Office Restroom Renovation] | [Tenant Improvement Project]

[Month Year] – [Month Year]

- Replaced and upgraded existing fixtures, supply lines, and drainage for multiple restrooms, ensuring ADA compliance and adherence to updated code requirements.
- Coordinated shutdowns and tie-ins during off-hours to minimize disruption to building occupants, completing work within the planned downtime windows.
