

# [First Last Name]

[City, State] | [email@example.com] | [(555) 555-5555]

## PROFESSIONAL SUMMARY

---

[Detail-oriented **Veterinary Technician** with [X] years of experience] supporting small animal practices in [general medicine, surgery, and emergency care]. Skilled in [patient assessment, anesthesia monitoring, and laboratory diagnostics] with a strong focus on [low-stress handling and client education]. Proven ability to [coordinate fast-paced treatment workflows], maintain accurate medical records, and collaborate closely with veterinarians and support staff to deliver high-quality, compassionate care.

## PROFESSIONAL EXPERIENCE

---

### [Veterinary Technician] | [Companion Animal Veterinary Clinic]

[Month YYYY] – Present | [City, State]

- Assisted veterinarians with [physical examinations, diagnostic procedures, and surgical interventions] for an average of [X–Y patients per day], ensuring accurate patient history collection and efficient appointment flow.
- Performed [venipuncture, catheter placement, radiographs, and in-house lab tests (CBC, chemistry, urinalysis, fecal exams)] using [IDEXX/Abaxis] equipment, contributing to timely diagnosis and treatment planning.
- Monitored anesthesia and post-operative recovery for [spay/neuter, dental, and soft tissue surgeries], documenting [vital signs, pain scores, and medication administration] in [practice management software such as AVImark/ezyVet/Cornerstone].

### [Veterinary Assistant / Technician Intern] | [Animal Care & Wellness Hospital]

[Month YYYY] – [Month YYYY] | [City, State]

- Supported the medical team by [restraining patients using low-stress techniques], preparing exam rooms, and maintaining [cleaning, disinfection, and inventory] protocols in compliance with [clinic and OSHA standards].
- Assisted with [vaccine administration, sample collection, wound care, and medication preparation], following detailed instructions and double-checking labels, dosages, and patient identifiers to reduce errors.
- Educated clients on [post-operative care, parasite prevention, nutrition, and medication administration], reinforcing veterinarian recommendations and documenting all discussions in the electronic medical record.

## EDUCATION

---

### [Associate of Applied Science in Veterinary Technology] | [Name of College]

[Month YYYY] – [Month YYYY] | [City, State]

- Completed coursework in [animal anatomy & physiology, pharmacology, anesthesia, clinical pathology, and radiology] with hands-on training in [laboratory procedures and surgical nursing].
- Participated in [X]-hour clinical externship at [Partner Veterinary Clinic/Animal Hospital], assisting with [patient intake, diagnostics, and nursing care] under supervision.

### [Certification / Credential (e.g., Licensed Veterinary Technician, CVT/LVT/RVT)] | [State/Certifying Body]

[Month YYYY] – Present

- [Successfully passed the Veterinary Technician National Examination (VTNE)] and maintain active credentialing through [continuing education in anesthesia, dentistry, and emergency care].

## SKILLS

---

- Clinical & Technical:** [Venipuncture], [IV catheter placement], [anesthesia monitoring], [radiography], [dental prophylaxis assistance], [laboratory diagnostics (CBC, chemistry, urinalysis, fecal analysis)].
- Patient Care:** [Low-stress handling], [pain assessment], [post-operative monitoring], [nursing care for hospitalized patients], [medication administration (oral, injectable, topical)].
- Surgery & Dentistry Support:** [Surgical preparation], [instrument sterilization], [surgical pack assembly], [dental charting assistance], [post-op discharge instructions].
- Client Communication:** [Explaining treatment plans], [discharge counseling], [preventive care education], [empathetic communication] in stressful or emotional situations.

- **Software & Tools:** [Practice management systems (e.g., AVImark, Cornerstone, ezyVet)], [IDEXX/Abaxis lab equipment], [digital radiography systems], [Microsoft Office / Google Workspace].
- **Regulatory & Safety:** [Medical record documentation], [controlled substance handling under supervision], [OSHA and clinic infection control protocols], [biohazard and sharps safety].
- **Professional Attributes:** [Detail-oriented], [team-focused], [calm under pressure], [strong time management], [commitment to animal welfare and ethical care].

## PROJECTS & CLINICAL HIGHLIGHTS

---

### [Clinic Workflow & Patient Flow Improvement Initiative]

[Month YYYY] – [Month YYYY] | [Companion Animal Veterinary Clinic]

- Collaborated with veterinarians and reception staff to [standardize patient intake checklists and treatment room setup], helping to reduce [average appointment turnaround time] and minimize delays for urgent cases.
- Created simple [treatment room supply checklists and restocking procedures], improving [readiness for emergency cases] and decreasing last-minute search time for critical supplies.

### [Preventive Care Education Materials]

[Month YYYY] – [Month YYYY] | [Animal Care & Wellness Hospital]

- Assisted in developing [client handouts and visual aids] on [vaccination schedules, parasite prevention, and at-home post-surgical care], supporting consistent messaging across the medical team.
- Collected informal feedback from clients and staff to [refine language and layout] of materials, making them easier to understand for first-time pet owners and clients with limited medical background.
